- Low Birth Weight Babies: 8.6% (Kids Count 2016)

THE DRIVERS OF HEALTH

Our behaviors, physical, social, and economic environments, and access to clinical care are all major drivers of health.

- Health Behavior: 30%
- Social & Economic Environment: 40%
- Clinical Care: 20%
- Physical Environment: 10%

The factors that drive our health are complex and interconnected. They can affect each other while also influencing our health and well-being.

</table>

* "n/a" means that data are not available. In some cases, national data comparable to state/county data are unavailable. In others, low figures in some counties were suppressed for privacy reasons.

** For "Quick Facts," a rank of 1 indicates highest value. For all other measures, a rank of 1 is best and 95 worst. For example, the county with the highest diabetes rate ranks 95th. Due to data availability, only 72 counties are ranked for overdose deaths and 87 counties for mental health providers.

*** TN value represents the 95-county average. US value represents the national recommended maximum.
