*"n/a" means that data are not available. In some cases, national data comparable to state/county data are unavailable. In others, low figures in some counties were suppressed for privacy reasons.
** For “Quick Facts,” a rank of 1 indicates highest value. For all other measures, a rank of 1 is best and 95 worst. For example, the county with the highest diabetes rate ranks 95*. Due to data availability, only 69 counties are ranked for overdose deaths and 89 counties for mental health providers.
*** TN and US values represents the median value across all counties.
**** TN and US values represents the averages across all counties.
