**THE DRIVERS OF HEALTH**

- **Health Behavior:** 30%
- **Social & Economic Environment:** 40%
- **Clinical Care:** 20%
- **Physical Environment:** 10%

Our behaviors, physical, social, and economic environments, and access to clinical care are all major drivers of health.

The factors that drive our health are complex and interconnected. They can affect each other while also influencing our health and well-being.

* n/a* means that data are not available. In some cases, national data comparable to state/county data are unavailable. In others, low figures in some counties were suppressed for privacy reasons.
** For “Quick Facts,” a rank of 1 indicates highest value. For all other measures, a rank of 1 is best and 95 worst. For example, the county with the highest diabetes rate ranks 95th. Due to data availability, only 69 counties are ranked for overdose deaths and 89 counties for mental health providers.
*** TN and US values represents the median value across all counties.
**** TN and US values represents the averages across all counties.
